Re: Notice of Intention to Commence Small Mining Operations, Harborlite Corporation's Perlite Pit, S/045/044, Tooele County, Utah

Dear Mr. Hullinger:

Thank you for your Notice of Intention to Commence Small Mining Operations, received by the Division on September 20, 1993. The application for the proposed Harborlite Corporations Perlite Pit, located in the NE 1/4 of Section 27, T7S, R5W, SLBM, Tooele County, Utah is complete and no additional information is required at this time. Please accept my apology for the unforeseen delay in forwarding this completeness acknowledgement to you.

Your notice stated that you will be excavating from an existing quarry. May we suggest that you take photos of the existing disturbance and also mark those disturbances on a map. In so doing, McFarland and Hullinger will only be held responsible for reclamation for any new disturbance and also areas that will be redisturbed.

For your reference, I have enclosed copies of our summarized rules regarding "Operation and Reclamation Practices", and the statutory penalty for failure to reclaim a minesite (SMO-1 and SMO-2).

Please give special consideration to item #10 of the "Operation and Reclamation Practices" (SMO-1). Stockpiling topsoil material prior to beginning your mining operation will help ensure successful revegetation efforts upon final reclamation of the minesite. If the area being mined is a solid rock outcrop, or if the land surface is very rocky, then soil stockpiling is probably not possible. However, even the first few inches of undeveloped material is worth saving to aid in later revegetation efforts, and future regulatory release from reclamation requirements.

Should you wish to expand your operation beyond the five (5) acre limitation, please notify this office as soon as possible to discuss the necessary permitting requirements.

A Memorandum of Understanding (MOU) between this Division and the State Department of Environmental Quality (DEQ) requires us to notify them upon receipt of a mining application. If you haven't already done so, you are advised to contact their office prior to starting your small mining operation to determine whether additional permits and/or approvals are required. We will forward a copy of this letter and your notice to the DEQ for their review. Their address and phone number is: Department of Environmental Quality, 288 North 1460 West, Salt Lake City, Utah, 84116, (801) 538-6146.

Thank you for your cooperation. When in the area, a member of the Division staff will examine the site. Best wishes with your mining operation.

Sincerely,

A handwritten signature in black ink, appearing to read "D. Wayne Hedberg". The signature is fluid and cursive, with the first name "D." and last name "Hedberg" clearly distinguishable.
